

Virtual Stock Market Game User's Guide

The Basics

- Each game is played on a “30-day” cycle beginning with the first business day of the month and ending on the last business day of the month.
- Each player has \$100,000 of virtual money to invest.
- At the end the cycle, all player's accounts are reset to \$100,000.
- Trades are completed during normal market trading hours only. Trades placed after normal hours are held in “pending” and processed when the market opens.
- The game uses real-time stock quotes from the primary markets of the NYSE, NASDAQ and American Stock Exchange.
- Over 4,300 stocks are available for trading. Stocks that typically trade at low volumes or in less frequency are not tracked for the game.
- Don't forget to use the Stock Market lesson plan found in the Educators site section of the TDBankWOW!Zone to teach the game in the classroom!
- Remind students... this is just a game... keep the learning fun!

Getting Started

In order to play the WOW!Zone Virtual Stock Market Game, players must:

- Click on “Play Now”
- Complete a one-time registration process at the WOW!Zone Virtual Stock Market Game home page. There is no cost involved. The WOW!Zone Virtual Stock Market Game is free.
